DETAILED ACTION

This application is in condition for allowance except for the following formal matters: In claim 1, "wherein said first end of said ring is spaced a first distance from said one end of said body, to a second position, where said first end is spaced from said one end by less than said first distance " is unclear to the Examiner.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Allowable Subject Matter

Claims 1-10 and 15-18 are allowed.

The following is an examiner's statement of reasons for allowance: regarding claim 1, patentability resides, at least in part, in the connector having a unitary, one-piece, molded plastic body and molded threads and a hollow compression ring cooperating with the molded plastic body to effect radial compression of the body in response to axial movement of the ring over the body, in combination with the other limitations of the base claim, and regarding claim 15, patentability resides, at least in part, in the connector having first, second and third means for mounting comprising: the third means for applying radial compression to first means in response to relative axial movement of the first and third means between a first position, wherein the third means partially encloses the first means, to a second position, where the third means fully

encloses both said first and second means, in combination with the other limitations of the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
